LEXIQUE D'ACCOMPAGNEMENT DE LA LISTE ABREGEE DES ESPECES ARMORICAINES

LEGENDE :

Colonne 1 : Abréviations utilisées dans la liste abrégée d'espèces.

Colonne 2 : Noms en clair des espèces selon la nomenclature actuellement valide.

NB : Dans la plupart des cas, ce sont les noms donnés par Flora Europaea. Quand il s'agit de taxons absents de cette flore, la nomenclature employée dans la Flore du Massif Armoricain est conservée. Pour les Ptéridophytes et le genre *Festuca*, les noms retenus ont été ceux respectivement préconisés par R. PRELLI et M. KERGUELEN.

Colonne 3 : Noms figurant dans la Flore du Massif Armoricain, quant ils sont différents de ceux notés dans la colonne 2.

* signifie qu'il s'agit d'une addition à la flore du Massif Armoricain.
